

8B *Getting the oxygen*

Your task is to produce an informative article on how an oxygen molecule from the air, reaches the muscles in the leg of an athlete.

You must:

- Decide on the presentation - prose / poetry / dialogue / cartoon / mixture
- Decide on the style, is the article to be sensational ? Should the account include eye witnesses ? Is this an intellectual story ?
- Explain clearly how the oxygen molecules are transported from the air to the muscle.
- Use at least five words from the word list

You should:

- Be imaginative !
- Include detailed diagrams or artwork
- Mention all the major organs
- Use at least ten words from the word list

You could:

- Use ICT to produce an illustrated report
- Work as a small team to produce an in-depth report
- Use technical words correctly and fluently.
